Abstract:

Your Abstract must be structured with the following five sections and contain fewer than 300 words.

1. Background
2. Questions/purposes
3. Methods
4. Results
5. Conclusions

Introduction

This section is between 400 to 600 words. Typically three to four paragraphs. Include one paragraph of background, one or two of rationale, and a final paragraph stating the questions or purposes. Formulate no more than two to four questions or purposes; each should be sufficiently important that their answers would appear in an Abstract.

Motivation and Objective

In this section list the objectives and the motivation for your project. The motivation section explains the importance behind your project. Why should the reader care? Why is your project idea is important

Methodology

Describes the general procedures or techniques used to identify, select, and analyze information applied to understanding the problem your project focus on. The methodology section should answers questions like: How was the data collected or generated? And, how was it analyzed?

Problem Analysis and Solution Design

Explain in details all the steps and the tasks you worked on to complete your project and achieve the project objectives. List all the idea that you have tried even if they did not work. focus on explaining the decisions made and the reasons for them.

Explain, all the challenges (if any) and how did you solve them.   Implementation details should be avoided unless some particularly tricky issue arises.

Evaluation and Observations

The Evaluation is critical. What lessons were learned during the project? Evaluate both the product and the process of its production. Review your plan and any deviations from it. Don't forget to sell your work! Tell the reader what was good, what was achieved. Be honest about limitations, these can be suggestions for future work.
